

GeoSpatial Innovations, Inc.

Founded in 1999, GeoSpatial Innovations, Inc. (GSI) is a private, women-owned software company providing software and services across North America. GSI delivers industry-leading software to improve productivity and safety for workers engaged in natural gas & electric design and optimization, vegetation management, and GIS implementation services. GSI is a certified women-owned business enterprise (WBE) by the women's business enterprise national council (WBENC).

UTILITY DESIGN & ENGINEERING SOFTWARE

Distribution Design Studio (DDS) is a design and engineering platform that streamlines electric and gas design workflows, reduces design cycle times and integrates design information with GIS, work management and other systems. The DDS solution includes structural analysis, electrical analysis, GIS rendering, CAD importing/editing, imagery services, GPS/GNSS collection and mobile tools, all in one package.

AN INTEGRATED COMPANION APPLICATION TO OUR DISTRIBUTION DESIGN STUDIO

Design your overhead and underground distribution lines safely, efficiently and accurately in the field with GPS/GNSS collection, eliminating double data entry and paper. DDS Designer features integrated real-time WAAS correction and is compatible with phones and tablets (iOS and Android), with or without an internet connection.

WE PROVIDE THE WORKFORCE & EXPERTISE TO GET YOUR DESIGN NEEDS MET

Utility Design Services (UDS) will execute the design you need while integrating critical information from your GIS and existing systems. All are built to your specific utilities' standards. We have the experience in the field to survey and input the data you need along with the expertise of using our own proprietary Distribution Design Studio our clients already love to bring the right solutions to life.

TRANSMISSION & DISTRIBUTION VEGETATION MANAGEMENT SOFTWARE

Forester is a vegetation management planning solution that can be easily configured for various contract types including time & material, unit-based and lump sum contracts. Forester's flexible software allows electric companies to coordinate contractors in the field with managers in the office, saving time and money.

ELECTRIC & GAS DISTRIBUTION FIELD DESIGN TOOL

Design your overhead and underground distribution lines safely, efficiently and accurately in the field with GPS/GNSS collection, eliminating double data entry and paper. GSI Designer features integrated real-time WAAS correction and is compatible with phones and tablets (iOS and Android), with or without an internet connection.

OUR STORY

WOMEN-OWNED BUSINESS ENTERPRISE (WBE)

GSI is a women-owned software firm and diverse supplier certified by WBENC. Tier 1 and Tier 2 opportunities are welcome.
